EXPERIENCE - Past Jobs

Nexalure Technologies – United Kingdom (Remote)
Front End Developer
JAN 2024 - PRESENT

- Proficiently utilized a tech stack based on React, React Native, Redux, TypeScript, JavaScript, Next, Node, API REST, SCSS, and Git to deliver high-quality applications.
- Have shown leadership by taking on responsibilities, and being available to help and guide teammates, especially in Git and in the application's tech stack.
- Actively engaged in code reviews and pair programming within an international team of 8 people, sharing valuable thoughts and different ways to solve problems based on design principles, React core concepts, and UX principles.
- Became actively involved in the Agile environment, task estimations, sprint planning, standup meetings, and sprint retrospectives.
- Facilitated collaborative problem-solving in a large team setting, effectively addressing issues through clear and specific communication strategies.

Academia da Web – Brazil (Remote)
Full Stack and BI Developer
JAN 2020 - JAN 2024

- Built ReactJS Single Page Applications (SPAs) using JavaScript, TypeScript, CSS, and Git for code versioning.
- Collaborated with the UI/UX design team, building responsive and modern pages with Figma.
- Utilized, with expertise, a tech stack that relied on Laravel (PHP), Bootstrap, MySQL, Git, and GitHub Actions to deploy, delivering a highly qualified application of charts and dashboards.
- Developed Power BI dashboards importing data from other datasets, integrating with PowerPoint's designs.

EDUCATION

Colégio Marista Maria Imaculada, Brazil — *School*
